

LEAD WIRES

Lead wires are used in two distinct industry: Oil Platform Construction and Fishing. Big size lead wire on wooden reels are used to balance oil platforms in the sea. Small size lead wires are used in fishing into the ropes. PVC coated lead wire is also used in fishing and it is an environmental friendly product preserving the sea from toxicity of lead; they are specially designed for mussel farming. Sizes from 10 gr/mt upto 2000 gr/mt.
